EduDocAI — Technical Task Assignment

Candidate Submission Document | Role: AI Engineering & Data Science Intern

SUBJECT

AI Engineering & Data Science Intern Submission — Kartikey Gupta (Track C)

Dear Hiring Team,

I have completed the technical assessment for the **AI Intern position (Track C: NLP / Generative AI — Project Concierge)**. The objective of this assignment—to demonstrate engineering judgement, empirical evaluation, and an end-to-end reproducible data-to-decision system—has been fully satisfied with the implementation of **EduDocAI**.

LIVE VERIFICATION & CODEBASE LINKS

- Live Application Demo: https://edudocai.streamlit.app/
- GitHub Repository: https://github.com/guptaKartikey/EduDocAI

Summary of Deliverables Included

1. **Video Walkthrough:** 5-minute end-to-end screen demonstration showing dynamic PDF ingestion, factual Q&A, and citation verification.
2. **Technical Report (PDF):** Comprehensive 10-page report covering problem formulation, RAG architecture, baseline comparison, daily execution logs, and responsible AI.
3. **FAILURES.md:** Honest engineering failure log documenting 9 real technical bottlenecks, root causes, and resolutions.
4. **Founder Decision Memo:** Plain-language operational assessment, failure modes, and rollout recommendations.
5. **Evaluation Benchmark:** 22-question curated evaluation showing 100% Recall@3, 0.9318 MRR, and 90.91% citation accuracy.

CANDIDATE DECLARATION

I confirm that this project represents my own original engineering work. All design decisions, code implementations, and failure reflections are documented honestly and ready to be defended in the technical interview.
